

# RCA RCT6272W23 Rear Camera Replacement

Replace the rear camera on your device.

Written By: Stephen Radachy

## INTRODUCTION

In this guide, you will learn how to replace the rear camera on your device.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
  - [Soldering Station](#) (1)
  - [Spudger](#) (1)
-

## Step 1 — Case

- Use a philips #00 screwdriver to unscrew both 4.064mm screws at the top of the device which hold it together.

## Step 2

- Press a plastic opening tool into the space between the front and back portions of the case.
- Run it along the perimeter of the device to unhook the many plastic tabs.
- Gently pull both sides apart.

⚠ The speaker is connected to the back cover so be careful when separating

## Step 3 — Motherboard

- Use a soldering iron to remove the soldered connections on the motherboard

⚠ For your safety and to ensure a correct repair, be sure to exercise caution when using the soldering iron.

ⓘ For more information about soldering, check out this [guide](#).

## Step 4

- Use a philips #00 screwdriver to unscrew the three 4.064mm screws which attach the motherboard to the front of the device.

## Step 5

- Use your fingers to pop the three black tabs up to release the flat plastic data transfer cables.

## Step 6

- Pull up the motherboard from the rest of the body.

## Step 7 — Rear Camera

- Using a spudger, gently pry off the camera from the back of the display

To reassemble your device, follow these instructions in reverse order.
